Auditor's Report on Review of Interim Financial Statements

To the Board of Directors of Misr Fertilizers Production Company "MOPCO"

1. Introduction

We have carried out a limited review of the interim financial statements of Misr Fertilizers Production Company "MOPCO", represented in the accompanying financial position as of 31st March 2025, and the related statements of profit or losses, comprehensive income, changes in shareholders' equity, and cash flows for the period then ended and a summary of the significant accounting policies and other explanatory notes.

Management is responsible for the preparation and fair presentation of these interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these interim financial statements based on our limited review.

2. Scope of Limited Review

We conducted our review in accordance with Egyptian Standard on Limited Review Engagements No. 2410, "Limited Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A limited review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim financial statements.

3. Un Qualified Conclusion

Based on our limited review referred to above, nothing has come to our attention that causes us to believe that the accompanying interim financial statements do not give a true and fair view of the financial position of Misr Fertilizers Production Company "MOPCO" (S.A.E) as at March 31th, 2025, and of its financial performance and cash flows for the three -months period then ended in accordance with Egyptian Accounting Standards.

This was noted in the commercial register on December 13, 2023.

1-2 The purpose of the Company:

- The purpose of the Company is the production of fertilizers, ammonia and nitrogen. The Company may also be in benefit from or get involved in any way in the incorporation or formation other companies engaging in activities similar or related to its activities, and which may help it to achieve its purposes inside and outside the Arab Republic of Egypt after the approval of General Authority for Investment and Free Zones (GAFI) and the Company must obtain all licenses necessary to carry out its activity.
- The extraordinary general assembly held on November 21, 2021, approved to add the below activities:
- Buying, selling and marketing all nitrogen fertilizer products and their derivatives.
- Developing, establishing, owning, financing, managing, maintaining and operating a project for the production of melamine and its derivatives.
- Marketing, distributing and selling the melamine product and its derivatives abroad and all over Egypt, except for the Sinai Peninsula region, where the approval of the Authority is required in advance.
- The extraordinary general assembly also authorized the Company to have an interest or to participate in any way in the incorporation or formation of other companies that engage in activities similar or related to its activities, and which may help it to achieve its purposes inside and outside the Arab Republic of Egypt after the approval of General Authority for Investment and Free Zones (GAFI) and the Company must obtain all licenses necessary to carry out its activity.
- The Extraordinary General Assembly, held on April 15, 2023, also approved adding the below activity:
- Production, distribution and sale of urea solution with different concentrations and used in different applications and uses, including car exhaust treatment.

The assembly also agreed to extend the term of the company for another twenty-five years, starting from the end of the previous period, and each extension of the term of the company must be approved by the extraordinary general assembly of the company, and a decision issued by the General Authority for Investment and Free Zones (GAFI) for it.

1-3 The Company's term:

- The Company's term is 25 years starting from the date of the Company's registration in the commercial register.
- The term of the company was extended for another twenty-five years ended on 27/07/2048, and this was noted in the company's commercial register on 31/05/2023.

1-4 The Company's Headquarters:

The company's administrative headquarters has been modified to become: Building 194, New Cairo, North 90th, Sector Two, City Center, Fifth Settlement, Cairo. The main center and location of industrial activity: the public free zone in the new city of Damietta, as shown in the commercial register issued on September 22, 2022.

2- Basics for preparation of financial statements

2-1 Compliance with accounting standards and laws

- The financial statements have been prepared in accordance with the Egyptian accounting standards and the related Egyptian law and regulations.
- The board of directors approved the issuance of the financial statements on May 10, 2025

2-2 Basis of measurement

The financial statements have been prepared on the historical cost basis except for the assets and liabilities which are stated at fair value through profit and loss.

2-3 Functional and presentation currency

The financial statements are presented in Egyptian Pound which is the Company's functional currency.

2-4 Use of estimates and personal judgments

The preparation of the financial statements in conformity with Egyptian Accounting Standards requires management to make judgments, estimates and assumptions that may affect the application of accounting policies and the reported amounts of assets, liabilities, revenues and expenses.

These estimates and associated assumptions are based on management's historical experience and other various factors which could be reasonable in the light of current circumstances and events based on which the carrying amount of assets and liabilities are identified and actual results may differ from these estimates.

These estimates and assumptions are reviewed on an ongoing basis and any differences in accounting estimates are recognized in the year in which those estimates were changed, and if these differences affect the year in which the change was made and future years, then these differences are included in the year in which the adjustment was made and the future years.

A- Personal judgment

Information about the judgments used in applying accounting policies that have a significant effect on the values presented in the financial statements are included below:

- Provisions for expected claims and contingent liabilities.
- Measurement of impairment in asset values.
- The useful lives of fixed assets.

B- Uncertain assumptions and estimates

Information about uncertain assumptions and estimates at the date of the financial statements, which may result in an effective adjustment in the book value of assets and liabilities in the next financial period, represented in:

- Recognition and measurement of provisions and liabilities: the underlying assumptions about the likelihood and magnitude of an outflow of resources.
- Measurement of expected credit losses for cash in banks, accounts and notes receivable, and other financial assets.

C- Fair value measurement

A number of the company's accounting policies and disclosures require the measurement of the fair values of financial and non-financial assets and liabilities.

The measurement of the fair value of assets and liabilities is mainly based on the available market data, and the data that is relied upon in the evaluation is classified according to the following hierarchy:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The company recognizes transfers between levels of the fair value hierarchy at the end of the financial period during which the change occurs.

Further information on the assumptions applied when measuring the fair value of financial instruments is included.

Damietta for Green Ammonia Company	25	1 566 325	25	2 407 651

Damietta for Green Ammonia Company:

- The Company has contributed in the establishment of a new company to produce green ammonia inside the public free zone in Damietta (Damietta for Green Ammonia Company) a joint stock company by free zone regulation with capital amounting to 1 000 000 US dollars in which the Company contributes 25% in it together with the Egyptian Petrochemicals Holding Company and Scatec Norwegian company.
- The value of investments in the company on March 31, 2025 amounted to 1,556,325 EGP equivalent to (50 thousand dollars) 25% of the issued capital.
- The company purpose is to produce green ammonia.
- The project is located in the public free zone in New Damietta.
- On June 29, 2024, a non-binding memorandum of understanding was signed regarding the principles of the agreement to purchase green ammonia between the Yara Norwegian company and the Damietta Green Ammonia Company in the city of Damietta, in which both the Egyptian Petrochemical Holding Company "ECHEM", which owns 31.47% of the capital, MOPCO and the Misr Company, contributed, for the production of fertilizers "MOPCO" and the Norwegian company Scatec, in the presence of Mr. Engineer / Prime Minister, Mr. Engineer, Minister of Petroleum and Mineral Resources, Mr. Dr. / Minister of Electricity and Renewable Energy, Mrs. Dr. Minister of Planning and Economic Development, Mrs. Dr. / Minister of International Cooperation, and Mr. Engineer / Chairman of the Board of Directors of the Egyptian Petrochemical Company. "Echem" and Mr. Engineer/Chairman of the Board of Directors of the Misr Fertilizer Production Company "MOPCO".

This agreement reflects confidence in the project and the investment climate in Egypt, The initial investment cost of the project amounts 890 million US dollars with a production capacity up to 150 thousand tons of green ammonia annually through the generation of renewable energy with a total capacity up to 480 megawatts. The project aims to produce green ammonia using the production capacities available at the Misr Fertilizers Production Company (Mopco). Operation is expected to start in 2027. The project comes within the framework of implementing the country's policy of using renewable energy sources and reducing carbon emissions.

Change in fair value up to the financial statements date	188 482 177	445 081 09

These are investments for the purpose of trading in the short term and achieving quick profits. The fair value is determined through an active market, and changes in the fair value associated with these assets are monitored regularly to reduce the impact of the market, liquidity and credit. The goal is to achieve higher returns while maintaining investments with high liquidity sufficient to meet cash requirements and needs as well as diversification in investments.

- The expected credit losses of financial assets on March 31, 2025 were studied by the company according to the following:
- The simplified approach was used to measure the credit risk of customer facilities by dividing customers into categories with similar characteristics and determining the historical period used to calculate the loss rate and determining the loss rate according to historical data, taking into account the expected changes in macroeconomic indicators (growth rate, inflation rate, unemployment rate) and then calculating the expected credit losses by multiplying (loss rate x balance exposed to loss x probability of default).
- The general approach was used to calculate expected credit losses related to the company's investments in financial assets at amortized cost, current balances in banks, deposits and other financial assets using external classifications from institutions included in the Central Bank's instructions for credit risk management. Future data was also used to determine whether there was a significant increase in credit risks for financial assets using some macroeconomic indicators (GDP growth rate, annual inflation rate, unemployment rate) under the assumption of three scenarios (basic, best, worst) in line with the requirements of Egyptian Accounting Standard No. (47).
- The loss rate for government debt instruments and deposits for a period of one month or less in Egyptian pounds was considered zero according to the Prime Minister's decision in this regard.
- The Egyptian classification was used with a loss rate at exposure to failure of 45% when measuring expected credit losses.

35- Fair value of financial instruments and management of its related risk:

Financial instruments are represented in financial assets (balances of cash and cash equivalent, subsidiary loan, due from related parties, advance payment suppliers and monetary items included in the debtors and other debit balances) in addition to financial liabilities (due to related parties, and monetary items included in creditors and other credit balances). According to the basis of evaluation applied to the Company's assets & liabilities, the carrying amounts for these financial instruments provide a reasonable estimate of their fair values.

- Interest risk

34-

- Foreign exchange risk
- Credit risk
- Liquidity risk

A. Interest rate risk

This risk is represented in the effect of changes in interest rates adversely on the value of the company's assets and liabilities. The company's management invests its cash investments in channels with fixed interest rates and for short-term periods in order to avoid the adverse effect of interest rate changes on the value of its assets and the return on them. The company follows up and analyses the interest rate risks regularly and calculates the impact of movements in market interest rates on the statement of profit or loss. The following table shows the balances of financial assets at the date of the financial position with fixed and variable interest rates.

Fixed interest rate In Egyptian pound	31/3/2025	31/12/2024
Time deposits	5 376 259 435	6 333 547 068
Financial assets at amortized cost (non-current)	10 532 176 567	5 562 646 156
Financial assets at amortized cost (current)	2 675 041 815	3 827 217 186
Financial assets at fair value through profit or loss	3 583 448 086	2 869 467 104
Financial assets at fair value through profit of loss	22 166 925 903	18 592 877 514

B. Foreign exchange risk

The company carries out some of its operational activities in foreign currencies, and therefore the company is exposed to the risk of fluctuations in foreign currencies with regard to payment schedules or collection of obligations or rights in currencies different from its own recording currency.

These obligations and rights are usually related to operational spending that is made with suppliers in currencies other than the Egyptian pound and revenues arising from some services rendered to clients abroad in addition to the loan balance granted to the subsidiary in US dollars. The company monitors the risk of fluctuations in foreign currencies arising from operational activities.

At the end of the financial position, the net assets / (liabilities) of the main foreign currencies adjusted in Egyptian pounds, are as follows:

Financial assets	Foreign currencies	Equivalent in Egyptian pound
USD	401 545 345	20 305 585 933
EURO	283 534	15 488 725
Financial liability	Foreign currencies	Equivalent in Egyptian pound
USD	4 414 366	223 228 309
ELIDO		2 = 22 (22
EURO	68 146	3 722 639

Below are the major foreign exchange rates

	Closii	ng rate	Averag	ge rate
In Egyptian pound	31/3/2025	31/12/2024	31/3/2025	31/3/2024
USD	50.5686	50.8414	50.5737	35.6446
EURO	54.6274	52.6224	52.4103	39.4006
Sterling pound	65.3245	63.6433	63.1800	45.9251

Response analysis:

The decline in the value of the Egyptian pound against other currencies on foreign currency balances on March 31, 2025 may lead to a decrease in shareholders' equity and profit and loss according to the value shown below

This analysis is based on exchange rate changes, which the company believes are considered a possibility that can be achieved. It is assumed in this analysis that all other variables, especially interest rates, remain constant and the impact of expected revenues and Expected costs.

The contribution to the 10% change from the closing price was as follows:

the currency	at March 31, 2025
Dollar	2 008 235 762
Euro	1 176 609

36- Important and subsequent events

- In light of a volatile global and local economic environment, compounded by increasing geopolitical risks, the Central Bank of Egypt took a series of measures during 2022, 2023, and early 2024 to mitigate the impact of these factors on the Egyptian economy. These measures included adjusting the exchange rate of the Egyptian pound against foreign currencies, followed by a currency float in March 2024, according to market mechanisms, which led to a depreciation of the pound. Additionally, interest rates on overnight deposits and lending were raised repeatedly, peaking with a 600 basis points increase in March 2024, bringing the rates to 27.25% and 28.25%, respectively, as part of an expanded loan agreement with the International Monetary Fund (IMF). Cash withdrawal and deposit restrictions were also imposed in banks.
- -These measures led to a slowdown in foreign currency transactions through official banking channels, resulting in delays in settling some international financial obligations and increasing the cost of obtaining and repaying foreign currencies. The persistence of these conditions, and the risks associated with them, represents an uncertainty factor that may affect the company's financial performance and its financial and operational obligations in foreign currencies.
- Within the framework of monetary policy, the Monetary Policy Committee decided, at its meeting on April 17, 2025, to reduce interest rates by 225 basis points, bringing the overnight deposit and lending rates to 25.00% and 26.00%, respectively. This follows cumulative increases of 800 basis points during 2024.
- In terms of inflation, data issued by the Central Agency for Public Mobilization and Statistics (CAPMAS) and the Central Bank of Egypt showed the following: The annual inflation rate nationwide reached 13.1% in March 2025, compared to 12.5% in February 2025, while the core inflation rate recorded 9.4%, the lowest in three years. Although inflation has eased compared to a peak of 38% in September 2023, continued inflationary pressures, especially in commodities, remain a near-term challenge.

The impact of international customs amendments on the company's operations

In April 2025, the United States government and other countries announced amendments to customs duty on a range of imported goods, including certain raw materials and industrial components utilized in the company's production processes. As this event occurred after the reporting date of March 31, 2025, and does not reflect conditions at that time, it is classified as a non-adjusting event in accordance with Egyptian Accounting Standard (EAS) No. 5 – "Subsequent Events"

Although the event does not necessitate any adjustment to the financial statements for the period ended March 31, 2025, management believes it may have a potentially material financial effect on future operating costs and profit margins, particularly in the event of increased costs for imported inputs.

Management continues to closely monitor developments in international trade and customs policies and will evaluate the potential financial and operational implications of such changes. Appropriate measures will be considered and implemented as necessary. Furthermore, any material updates related to this matter will be disclosed in future reporting periods in accordance with EAS No. 5.

Disclosure and Transparency

In view of the significance of this event and its potential impact on future financial performance, management has elected to disclose it in this note to ensure transparency and full compliance with both Egyptian and international accounting standards, despite the absence of any direct effect on the financial results for the period ended March 31, 2025

C. Credit risk

- The credit risk for the company is related to the failure of the contracting parties to fulfill contractual obligations, especially with regard to balances due from customers, financial instruments, bank balances and the like.

All customers' balances have been collected during the subsequent period from the date of issuance of the financial statements

It is possible to analyze the credit risks to which the company is exposed at the level of each sector as follows:

Local customers:

The credit risk of local customers is limited, as local customers are granted a credit period of up to 15 days from the date of issuing the invoice, as credit customers are inquired before agreeing to grant them the said period to ensure the creditworthiness of those companies.

Foreign customers:

The credit risk of external customers is limited because most of the company's external customers are reputable customers and sales are made to them in exchange of letters of credits or advance payment policy.

Cash balances at banks:

The credit risk associated with cash balances and cash equivalents is a very limited risk, as the group deals with banks with a good reputation in the market.

In Egyptian pound	Note no.	31/3/2025	31/12/2024
Financial assets at amortized cost	<u>(7)</u>	13 207 218 382	9 389 863 342

		25 392 112 698	21 457 423 809

D. Liquidity risk

Liquidity risk is represented in the factors that may affect the company's ability to pay all its obligations. The management monitors each of the liquidity risk resulting from the uncertainty associated with the cash inflows and outflows by maintaining an adequate level of cash balances.

37- Contingent liabilities

The value of letters of guarantee and letters of credit issued by banks for the Company and for the benefit of third parties on March 31, 2025 amounted to 21 million US dollars, amounted to 2 million EURO and the value of the cash cover withheld on account of those letters of guarantee and credit amounted to 100% of their value, which is included in other financial assets and the goods in transit.

38- Capital Commitments

Capital commitments are represented in the value of contracts that the company signed to gain or construct a fixed assets and still not yet completed as at March 31, 2025. The following table shows these significant contracts:

	Total contract	Completed	Incomplete
	value as at	contracts as at	contracts as at
	31/3/2025	31/3/2025	31/3/2025
Contracts in Egyptian pound	12 777 600	3 772 047	9 005 553
Contracts in USD	898 035	378 271	519 764
Contracts in EURO	37 816 675	19 281 670	18 535 005

40- Disputes

40-1The New Urban Communities Authority and the New Damietta Development and Reconstruction Authority filed Case No. 1486 of 2012, Kafr Saad against each of the Egyptian Petrochemical Holding Company (ECHEM) as a first defendant and the Company as a second defendant, in which the plaintiffs demanded that the second defendant (the company) be required to pay a value for the right of use of a land area of 608,324 square meters east of the navigational canal, which belongs to the subsidiary company "The Egyptian Company for Nitrogen Products ENPC" at an amount of 157 million pounds, in addition to interest and compensation. , which is contrary to the applicable law (6 pounds / meter / year). The company's management believes that the Urban Communities Authority is not entitled to claim these values.

On 1/2/2015, the company signed a memorandum of understanding with the Ministry of Defense according to which the following was agreed upon:

- The company agrees to end the existing dispute with the New Urban Communities Authority with the authority receiving the plot of land and paying the subsidiary the rent due on it.
- The Ministry of Transport / Damietta Port Authority provides an alternative site for the dock land with a guarantee from the competent authorities to renew all necessary approvals and licenses from the concerned authorities for the new site and renew the license of the Prime Minister No. (555) for the year 2007 for the new site as well as providing a suitable space behind the dock for storage and to provide a service corridor between the dock and the factory.
- Compensating the subsidiary for a piece of land it owns by giving it an alternative piece of land.
- Compensating the subsidiary for the losses and costs it incurred because of evacuating the sites.

A ruling was issued obligating the company to pay the amount of thirty-eight million and seven thousand pounds, and the ruling was appealed.

MOPCO and the Egyptian Company for Nitrogen Products appealed the ruling before the Court of Appeal, which decided to reject the two appeals and uphold the appealed ruling without prejudice to the company's

right to appeal within the legal period against the ruling before the Court of Cassation within the legal deadlines.

In January 2022, the company settled and appealed in cassation, which does not stop the execution of the ruling and did not set a session to consider the appeal to date.

- **40-2** The company received a claim from Petrotrade in the amount of 4 million pounds represented in the interests of delay in the payment of gas bills. The company and its legal advisor consider that Petrotrade has no right to claim the delay benefits according to the gas supply contract.
- **40-3** On 16/12/2019, the company filed suit No. 53592 for the year 75 against both the Minister of Investment the head of the General Authority for Investment and Free Zones the head of the central management of the public free zone in Damietta before the Administrative Court, in order to cancel the decision of the Board of Directors of the General Authority for Investment to increase In exchange for the right of use of the factory land in the free zone in Damietta from \$1.75/m2 annually to \$5/m2 annually, and the requirement to fix the right of use consideration throughout the project license period (25 years) starting from 2005 and ending in 2030 according to the contract concluded between the two parties.

The court decided to accept the lawsuit in form and in the matter, acquitting the company of the amount claimed by the General Authority for Investment and Free Zones and obligating the defendant to pay the expenses.

The General Investment Authority has appealed the ruling, and a hearing has not yet been set for the ruling.

- The Council of Ministers issued a decision on 10/12/2023 obliging the General Authority for Investment and Free Zones to fix the annual rental value of the price per square meter at \$ 1.75.
- 40-4 Pursuant to a sale and assignment contract dated March 26, 2007, the Egyptian Nitrogen Products Company, owned by Mopco, a subsidiary of the petroleum sector, purchased a plot of land with an area of 150 thousand square meters located in the Al-Rehab Industrial Zone in New Damietta City from the Al-Rehab Saudi Egyptian Company for Investment and Real Estate Development to be used in establishing storage facilities for the company's fertilizer complex products that were planned to be established at that time. Al-Rehab Company was notified by letter from the Commercial and Real Estate Affairs Sector No. 1191 dated February 18, 2007 of the approval of the competent authority in the New Urban Communities Authority for the company's request to sell the land area for a total amount of 4,500,000 US dollars (four million five hundred thousand US dollars) 3,750,000 Egyptian pounds (three million seven hundred and fifty thousand Egyptian pounds). The company paid the full price.
- *- Al-Rehab Saudi Company, based on the letter of the Chairman of the New Damietta City Development and Reconstruction Authority dated No. 1380 on 2/27/2007, paid an amount of 3,450,000 Egyptian pounds to complete the transfer procedures in favor of the Urban Communities Authority (transfer fees), and the amount was paid in full.
- -* The New Damietta City Development Authority approved the procedures for relinquishing the land in accordance with the rules in force at the New Urban Communities Authority in favor of the Egyptian Company for Nitrogen Products, and the Egyptian Company for Nitrogen Products proceeded with the procedures for establishing storage facilities for its fertilizer complex on the above-mentioned land.
- Whereas the company had begun to exploit that plot to implement environmentally friendly projects and establish strategic projects, it was surprised by the New Urban Communities Authority's dispute over that area on August 10, 2023, with the presence of a committee from the New Damietta City Development Authority objecting to establishing any projects on the grounds that the land is owned by the New Damietta City Development Authority.
- Whereas a request was submitted to present the dispute to the Ministerial Committee for Investment Dispute Resolution on December 3, 2024, including confirmation of Mopco's right to own the aforementioned land, which supported the company's request in a letter from Mr. Counselor/ Head of the Cabinet Advisory Board, addressed to Mr. Dr./ Minister of Housing, Utilities and Urban Communities, which concluded that upon

presenting the matter to Mr. Dr. Prime Minister, His Excellency kindly approved the legal opinion and directed the concerned parties to write to take the necessary steps to implement it.

- Obligating both the New Urban Communities Authority and the New Damietta City Development Authority to implement what was stated in the opinion approved by His Excellency the Prime Minister, which was communicated to Mr. Dr. / Minister of Housing, Utilities and New Urban Communities, and granting Mopco Company an appropriate period to implement environmentally friendly projects on the plot of land in a way that provides hard currency for the country and benefits the national economy. No session has been set before the committee to consider the request to date.
- In light of the objection and grievance of the New Damietta City Development Authority against the previous decision, Mr. Counselor / Chairman of the Council of Ministers' Advisory Board stated the need to present the matter to the Ministerial Committee for Settling Investment Disputes. The company submitted a request to the committee and the company's request for ownership of the land will be considered, noting that the company addressed the Ministry of Petroleum and Mineral Resources regarding environmentally friendly industrial projects related to the company's activity that benefit Mopco.
- On December 19, 2024, a memorandum was received from the company's legal committee stating that the dispute had been submitted to the Ministerial Committee for the Resolution of Investment Disputes, and that consideration of it had been postponed to the session of January 20, 2025. The committee also recommended in its aforementioned session to create a financial allocation in accordance with the vision of the financial administration.

41- Significant Events

- The Ordinary General Assembly of the Egyptian Company for Nitrogenous Products was held on November 2, 2023, which approved the removal of the company from the commercial register, and the Assembly also acquitted the members of the Board of Directors of the Egyptian Company for Nitrogen Products for the fiscal year 2023 until the date of the Assembly.
- The extraordinary general assembly decided on November 4, 2023 the merge of the Egyptian Nitrogen Products Company (ENPC) a merged company with Misr Fertilizers Production Company (MOPCO) merging company and that on book value basis in accordance to the financial statements on December 31, 2022 which is the date used as a base for merge in accordance to the report issued by the economic performance at the General Authority for Investment and Free Zones by the formed committee in accordance to the decision of the Minister of Investment and International Cooperation No. 95 of 2018. The committee's decision was approved by the Chief Executive Officer of General Authority for Investment and Free Zones on September 21, 2023 with the distribution of the capital of the merging company and the merged company on the basis of net equity of the merging company and the merged company according to the market value of the assets of the merging company and the merged company on the date used as a base for merge.

New versions and amendments made to the Egyptian Accounting Standards

- On March 6, 2023, the Prime Minister issued Decision No. (883) of 2023 amending some provisions of the Egyptian Accounting Standards.
- On March 3, 2024, also, the Prime Minister issued Decision No. (636) of 2024 amending some other provisions of the Egyptian Accounting Standards. The following is a summary of the most important of these amendments:

Egyptian Accounting Standard No. (36) amended 2023 "Exploration and evaluation of mineral resources"	1- This standard was reissued in 2023, allowing the use of the revaluation model when subsequently measuring exploration and evaluation assets. 2- The company applies either the cost model or the revaluation model for exploration and evaluation assets, provided that the evaluation is carried out by experts specialized in evaluation and valuation among those registered in a special register at the Ministry of Petroleum, and in the event of applying the revaluation model (whether the model included in Egyptian Accounting Standard (10) "Fixed Assets and Their Depreciation" or the model included in Egyptian Accounting Standard (23) "Intangible Assets") it must be consistent with the classification of assets in accordance with paragraph No. (15) of Egyptian Accounting Standard No. (36) amended 2023.	The company doesn't own this type of asset, so this amendment doesn't impact the financial statements.	The amendments to add the option to use the revaluation model apply retrospectively to financial periods beginning on or after January 1, 2023, with the cumulative effect of applying the revaluation model initially recognised by adding it to the revaluation surplus account alongside equity at the beginning of the financial period in which the company first applies this model.
Egyptian Accounting Standard No. (35) amended 2023 "Agriculture"	This standard was reissued in 2023, amending paragraphs (1-5), (8), (24), and (44) and adding paragraphs (5a)-(5c) and (63), regarding the accounting treatment of bearer plants (and accordingly amending Egyptian Accounting Standard (10) "Fixed Assets and Their Depreciation").	The company doesn't own this type of asset, so this amendment doesn't impact the financial statements.	These amendments shall apply for annual periods beginning on or after January 1, 2023, retrospectively, with the cumulative effect of the accounting treatment for bearer plants initially recognised by adding it to the balance of retained earnings or losses at the beginning of the financial period in which the Company first applies this treatment.

Egyptian Accounting Standard No. (34) amended 2024 "Real Estate Investment	Egyptian Accounting Standard No. (34) "Real Estate Investment" was reissued in 2024, where the mechanism for applying the fair value model was amended, where it was added that profit or loss arising from the change in the fair value of real estate investment must be recognized in the statement of profits or losses for the period in which this change arises or through the statement of other comprehensive income for one time in the life of the asset or investment, taking into account paragraphs (35a) and (35b) of the standard.	Management is currently studying the possibility of changing the accounting policy followed and using the fair value model option contained in the standard, and assessing the potential impact on the financial statements if this option is used.	The amendment to the amendments to add the option to use the fair value model applies to financial periods commencing on or after January 1, 2024, and allows for early application retroactively, with the cumulative impact of the application of the fair value model being initially demonstrated by adding it to the calculation of the balance of profits or losses carried forward at the beginning of the financial period in which the Company applies this model for the first time.
Egyptian Accounting Standard No. (17) amended 2024 "Standalone Financial Statements"	Egyptian Accounting Standard No. (17) "Standalone Financial Statements" was reissued in 2024, adding the option to use the equity method as described in Egyptian Accounting Standard No. (18) "Investments in Associated Companies" when accounting for investments in subsidiaries, associates and companies with joint control.	The management is currently studying the possibility of changing the accounting policy followed and using the equity method when accounting for investments in subsidiaries, associates and jointly controlled companies, and evaluating the potential impact on the financial statements in the event that this method is used.	The amendments apply to financial periods beginning on or after January 1, 2024, and early application is permitted retrospectively, with the cumulative effect of applying the equity method being recognised by adding it to the retained earnings or losses account at the beginning of the financial period in which the company

		first applies this method.
Accounting Standard No. (13) amended 2024 "Effects of Changes in Foreign to determine the spot rate when two currencies are not exchangeable and the conditions that must be met for the spot exchange rate at the measurement date. An application guidance appendix was added, which includes guidance for assessing whether a currency is exchangeable for another	Management is currently assessing the potential impact on the financial statements from the application of the amendments to the standard.	method. The amendments to the spot rate determination when two currencies are difficult to exchange apply to financial periods beginning on or after 1 January 2024. Early application is permitted, and if an entity early adopts, it must disclose this. On application, an entity shall not restate comparative information. Instead: • When an entity reports foreign currency transactions in its functional currency, any effect of initial application is recognised as an adjustment to the opening balance of retained earnings at the date of initial application. When an entity uses a presentation currency other than its functional currency other than its functional currency or translates the results and financial position of a foreign operation, any effect of initial application is recognised as an

			cumulative amount of translation differences - accumulated in equity - at the date of initial application.
Accounting Interpretation No. (2) "Carbon Emission Reduction Certificates"	Carbon Credits: are tradable financial instruments that represent greenhouse gas emission reduction units, each unit represents a ton of equivalent carbon dioxide emissions, and are issued to the developer of the reduction project (owner/nonowner), after accreditation and verification in accordance with internationally recognized carbon emission reduction standards and methodologies, carried out by local or international verification and certification bodies registered in the list prepared by the Financial Regulatory Authority for this purpose. Companies can use carbon emission reduction certificates to meet voluntary emission reduction targets (for companies) to achieve carbon exchange or other targets, which are traded in the voluntary carbon market. (Voluntary Carbon Market "VCM") The accounting treatments differ according to the nature of the arrangement and the commercial purpose of purchasing or issuing certificates by project developers. Therefore, companies must determine the facts and identify the different circumstances to determine the appropriate accounting treatment and the accounting standard to be applied. The interpretation addresses the accounting treatment of different cases in terms of initial measurement, subsequent measurement, exclusion from books, and necessary disclosures.	The management is currently studying the financial implications of applying the accounting interpretation to the company's financial statements.	Application begins on or after January 1, 2025 and early application is permitted.
Egyptian Accounting Standard No. (51) "Financial Statements in Hyperinflationary Economies"	On October 23, 2024, Prime Ministerial Decree No. 3527 of 2024 was issued to add a new accounting standard No. 51 "Financial Statements in Hyperinflationary Economies" to the Egyptian Accounting Standards, to deal with hyperinflationary economies, for any entity or establishment whose currency of record is in a hyperinflationary economy.	No decision has been issued by the Prime Minister or his delegate to specify the start and end dates of the financial period or periods during which this standard	No decision has been issued by the Prime Minister or his delegate to determine the start and end date of the financial period or periods during which this standard must be applied

	Finance, to determine the appropriate index to be used when applying this standard to the local currency. This procedure contributes to increasing comparability between different financial periods, which contributes to making more informed investment and administrative decisions. In addition, the standard requires disclosure of the adjustment method. Any estimates or personal judgments made to ensure transparency, and how inflation affects the financial statement items, should be explained. There is no impact on the financial statements for the period ending December 31, 2024		

42- Significant Accounting policies applied

421-1 Foreign currency translation

The company's accounts are maintained (in Egyptian pounds), and transactions in foreign currencies are recorded in the books on the basis of the exchange rates in effect for foreign currencies at the time of recording the transactions. On the date of the financial position, the balances of monetary assets and liabilities in foreign currencies are translated into the currency of dealing using the exchange rates in effect on that date. Non-monetary balances that are measured on a historical cost basis in foreign currencies are translated using the exchange rate at the date of the transaction. Currency differences in profit or loss resulting from transactions during the year and from revaluation at the date of the financial position are included in the profit or loss statement.

42-2 Fixed Assets and their depreciation

Recognition and measurement

- Fixed assets that are used in production, providing goods & services or for administrative purposes are stated at historical cost less accumulated depreciation and cumulative impairment losses resulted from impairment in the values of fixed assets. Cost includes expenditures that are directly attributable to the acquisition of the asset and necessary to have the asset ready for use in the purpose for which the management decided asset to be acquired for.
- When parts of an item of fixed assets have different useful lives, they are accounted for as items (major components) of fixed assets.
- Assets are stated in the construction phase for production or for rent or for administrative purposes at cost less cumulative impairment losses. Cost includes professional fees and all direct costs related to the asset. Depreciation of these assets starts when they are completed and prepared for use in a specific purpose.
- The cost of internal constructed assets includes the cost of materials, direct labor and any other costs directly attributable to bringing the asset to a working condition for its intended use.

Subsequent costs to acquisition

The cost of replacing a component of an asset is recognized in the cost of the asset after dispose the cost of that component when the company incurs the replacement cost and if it is probable that future economic benefits will flow to the company as a result of replacing this component, on condition of the possibility of measuring its cost with a high degree of accuracy. Other costs are recognized in the income statement as an expense when incurred.

Depreciation

- Depreciation is charged to the statement of profit or loss on a straight-line basis over the estimated useful lives of each type of asset or the useful life of major components of an item of fixed assets which are accounted for individually. (Land is not subject to depreciation). The estimated useful lives of the fixed assets for depreciation calculation are as following: -

	Merging company
Description	Depreciation rate
- Buildings and construction	25% - 2.56%
- Vehicles and transportation	20%
- Machines, production lines*	4% - 20%
- Tools and equipment	14.29% - 15%
- Aid factors	10% - 50%
- Furniture and movables	10% - 20%
- Central	15%
- Computers	33.33% - 25%

- Fixed Assets are depreciated when it ready for use in the intended purpose.
- * The Board of Directors No. 231, that held on October 2, 2013, approved by decision No. 1094 to modify the useful lives of machines and equipment from 25 to be 20 years starting from January 1, 2013, in addition, agreed to modify the useful life of Gas Cooler from 20 to be 8 years by decision No. 1128 starting from January 1, 2014, and for three years.

Profit and loss from disposal of fixed assets:

Profit and losses from disposal of fixed assets are identified by comparing the disposal return with the net book value of the asset, and the resulting profits or losses are recorded in the statement of profit or loss.

42-3 Projects under construction

Projects under construction is recorded at cost less accumulated impairment in value, if any, and the cost includes all costs directly related to the asset and necessary to prepare the asset to the state in which it is operated and for the purpose for which it was acquired. Projects under construction are transferred to the item of fixed assets when they are completed and available for the purpose for which they were acquired, and then their depreciation begins using the same bases used in the depreciation of similar items of fixed assets.

42-4 Other assets

A. Recognition

Identifiable non-monetary assets acquired for business purposes and from which future benefits are expected to flow are treated as other assets. Other assets consist of the Company's contribution in assets not owned to it and serve its purposes, as gas pipeline.

B. Measurement

Other assets are measured at cost, being the cash price at recognition date.

If payment is deferred beyond the normal credit terms the difference between the cash price equivalent and the total payment is recognized as interest over the period of credit. Other assets are presented net of accumulated amortization and accumulated impairment losses

C. Subsequent expenditures

Subsequent expenditure on the acquisition of other assets is capitalized only when such expenditure increases the future economic benefits of the asset to which it relates. All other expenses are charged to the statement of profit or loss when incurred.

D. Amortization

Amortization is charged to the statement of profit or loss on a straight-line basis over the estimated useful lives of other assets. Other assets with indefinite useful live are systematically tested for impairment at each statement of financial position date. Other assets are amortized from the date they are available for use as following:

Description	Amortization
- The Company's contribution in assets not owned to it and serve its purposes.	20%
- Gas pipeline	4%
- Licenses and software	25%

42-5 Impairment in the value of tangible and intangible assets

The company, on an annual basis - or whenever necessary - reviews the book values of its tangible assets to determine whether there are indications or indications of a possible impairment in their value. If such indications are available, the group estimates the recoverable value of each asset separately in order to determine impairment loss in its value. If it is not possible to estimate the recoverable amount of the asset, the company estimates the recoverable amount of the cash-generating unit to which the asset belongs. In the event that logical and fixed bases are used to distribute assets to cash-generating units, the general assets of the group are also distributed to those units. If this cannot be achieved, the general assets of the group are distributed to the smallest group of cash-generating units that the group can identify using logical and fixed basis.

With regard to intangible assets that do not have a specified default life or are not yet available for use, an annual test is conducted for impairment in their value, or as soon as there is any indication of the exposure of these assets to impairment.

The recoverable amount of the asset or the cash-generating unit is represented in the "fair value less costs to sell" or "value in use", whichever is greater.

The estimated future cash flows from the use of the asset or the cash-generating unit are discounted using a pre-tax discount rate to get the present value of those flows, which express their use value. This rate reflects current market estimates of the time value of money and the risks associated with that asset, which were not taken into account when estimating the future cash flows generated from it. If the estimated recoverable amount of an asset (or cash-generating unit) is less than its carrying amount, the carrying amount of that asset (or cash-generating unit) is reduced to reflect its recoverable amount.

Impairment losses are recognized immediately in the income statement. And when the impairment loss recognized in previous periods is canceled out in a subsequent period, the book value of the asset (or cash-generating unit) is increased in line with the new estimated recoverable amount, provided that the revised book value after the increase does not exceed the original book value that could have been the asset would reach it if the loss resulting from impairment was not recognized in its value in previous years. Such reverse adjustment of impairment losses is recognized immediately in the profit or loss statement.

42-6 Revenue from contracts with customers

- •The company has implemented Egyptian Accounting Standard No. 48 as of January 1, 2021.
- •Egyptian Accounting Standard No. 48 replaces Egyptian Accounting Standard No. 11 "Revenue" and Egyptian Accounting Standard No. 8 "Construction Contracts" and related interpretations. EAS 48 deals with the recognition of revenue from contracts with customers as well as the treatment of additional costs incurred in obtaining a contract with a customer, which will be explained in more detail below.
- Egyptian Accounting Standard No. 48 states that revenue recognition depends on the following five steps:
- Step 1: Define the contract with the customer
- Step 2: Identify performance obligations in the contract.
- Step 3: Determine the transaction price.
- Step 4: Allocate the transaction price to the performance obligations in the contract.
- Step 5: Revenue is recognized when (or whenever) the entity fulfills the performance obligation.

In addition, Egyptian Accounting Standard No. 48 includes disclosure of financial statements, with respect to the nature, amount, timing and uncertainty of revenue and related cash flows.

- Revenue recognition

The management evaluated the impact of applying the new standard on the company's financial statements, by applying the five-step model, and concluded that the current basis for revenue recognition is still appropriate because the only performance obligation is to deliver the sold quantities to its

customers, whether local or foreign, as it is according to the contracts concluded with customers. The company transfers control over the quantities sold to customers according to the following:

A. Domestic sales

The date on which the goods were authorized to leave the company's gates.

B. Export sales

According to the shipping terms, which is usually the date of shipment at the port.

Therefore, management considers that the initial recognition of Egyptian Accounting Standard No. 48 has no significant change or impact on the company's accounting policies applied to its financial statements.

- The value of the revenue is measured at the fair value of the consideration received or due to the entity when there is sufficient expectation that there will be future economic benefits that will flow to the entity, and that the value of this revenue can be measured accurately, and no revenue is recognized in the event of uncertainty about the recovery of this revenue or associated costs.

42-7 Financial Instruments

Financial Assets:

Recognition and Initial Measurement:

On initial recognition, financial assets are classified according to the business model in which those financial assets are managed and their contractual cash flows, according to one of the following categories:

- (1) Debt instruments at amortized cost.
- (2) Debt instruments at fair value through other comprehensive income, "with profits or losses being reclassified to the statement of profit or loss upon disposal."
- (3) Equity instruments at fair value through other comprehensive income, "without reclassifying profits or losses to the statement of profit or loss upon disposal."
- (4) Financial assets at fair value through profit or loss, including equity instruments and derivatives.

Debt Instruments at Amortized Cost:

A financial asset is measured at amortized cost if it meets the following two conditions, and is not measured at fair value through profit or loss:

The asset is held within a business model whose objective is to hold assets to collect contractual cash flows, and The contractual terms of the financial assets give rise to cash flows on specified dates that are solely payments of principal and interest on the principal amount repayable.

Debt instruments at fair value through other comprehensive income:

Debt instruments are measured at fair value through other comprehensive income (with profits or losses being reclassified to the statement of profit or loss upon disposal) only if the following two conditions are met and were not measured at fair value through profit or loss:

The asset is held within a business model whose objective is achieved through the collection of contractual cash flows and the sale of financial assets, and

The contractual terms of the financial assets give rise to cash flows on specified dates that are solely payments of principal and interest on the principal amount repayable.

Debt instruments at fair value through other comprehensive income:

Upon initial recognition of an investment in shares that are not held for trading, the company may choose "irreversibly" to measure subsequent changes in fair value within the items of other comprehensive income "without reclassifying profits or losses to the statement of profit or loss upon disposal." This selection is made on an investment-by-investment basis.

Financial assets at fair value through profit or loss:

All other financial assets are classified as at fair value through profit or loss.

In addition, upon initial recognition, the company may irrevocably designate a financial asset that meets the requirements to be measured at amortized cost or at fair value through other comprehensive income, as at FVTPL, if doing so It will eliminate or significantly reduce an accounting mismatch that might otherwise arise.

Subsequent measurement:

Debt Instruments at Amortized Cost:

After initial measurement, debt instruments are measured at amortized cost using the effective interest rate method, less provision for impairment. Amortized cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. Expected credit losses are recognized in the statement of profit or loss when the value of the investments is impaired.

Debt instruments at fair value through other comprehensive income:

Debt instruments at fair value through other comprehensive income are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income. Interest income and foreign exchange gains and losses are recognized in the statement of profit or loss in the same way for financial assets measured at amortized cost.

The method for calculating the expected credit losses for debt instruments at fair value through other comprehensive income. When a company has more than one investment in the same security, it is considered to have been disposed of on a first-in, first-out basis. On derecognition, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from other comprehensive income to the statement of profit or loss.

Financial assets at fair value through profit or loss:

Financial assets at fair value through profit or loss are recognized in the statement of financial position at fair value. Changes in fair value are recognized in the statement of profit or loss. The interest earned on assets that are obligatory to be measured at fair value is also recognized in the statement of profit or loss using the contractual interest rate, as explained in Note (3-25-1-4). Dividend income from equity instruments measured at fair value through profit or loss is recorded in the statement of profit or loss as other operating income when the right to payment is established.

Reclassification of Financial Assets:

The company does not reclassify its financial assets after initial recognition.

Disposal of the financial asset:

Derecognition from the books other than a material modification:

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- § The right to receive cash flows from the asset has expired, or
- § The Company has transferred its right to receive cash flows from the asset or assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; In addition to:
 - a) The company has transferred substantially all the risks and rewards associated with the asset; or
 - b) The Company has neither transferred nor retained substantially all the risks and rewards associated with the asset but has transferred control of the asset.

The Company considers control to be transferred if, and only if, the transferee has the practical ability to sell the entire asset to an unrelated third party and can exercise that ability unilaterally and without additional restrictions on the transfer.

When the Company has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognized only to the extent of the Company's continuing involvement, in which case the Company also recognizes an associated liability. The transferred assets and its associated liabilities are measured on a basis that reflects the rights and obligations that the Company has retained.

Continuing participation that takes the form of a guarantee over the transferred asset is measured at the lower of the original book value of the asset and the maximum amount the company could be required to pay.

Derecognition from the books because of a material modification of the terms and conditions:

The Company derecognizes the financial asset when the terms and conditions are renegotiated to the extent that the financial asset becomes, to a large extent, a new instrument, with the difference being recognized as a gain or loss because of derecognition of the asset. In the case of amortized cost debt instruments, newly recognized loans are classified as stage 1 for the purposes of measuring ECL.

In assessing whether to derecognize a financial instrument, among other things, the Company considers the following factors:

- Change in the currency of the debt instrument.
- Introducing the equity instrument functionality.

- Change to the other side.
- If the adjustment is such that the instrument no longer meets the criterion of cash flows that are only principal and interest payments on the principal amount repayable.

If the adjustment does not result in substantially different cash flows, the adjustment does not result in derecognition. Based on the change in cash flows discounted at the original effective interest rate, the company records an adjustment gain or loss.

Impairment of Financial Assets:

The Company recognizes an allowance for expected credit losses for all debt instruments not held at fair value through profit or loss. The expected credit losses are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the company expects to receive, discounted at the appropriate effective interest rate.

To assess the extent of impairment in the value of financial assets, financial assets are classified at the date of the financial statements into three stages:

The first stage: financial assets that have not experienced a significant increase in credit risk since the date of initial recognition, and the expected credit loss is calculated for them for a period of 12 months.

The second stage: the financial assets that have witnessed a significant increase in credit risk since the initial recognition, and the expected credit loss is calculated for them over the life of the asset.

The third stage: the financial assets that have experienced impairment in their value, which requires calculating the expected credit losses for them over the life of the asset based on the difference between the book value of the instrument and the present value of the expected future cash flows.

The Company's investments in debt instruments consist only of treasury bills, government treasury bonds, and bonds rated in the top investment category (Very Good and Good) by international independent credit agencies and, therefore, are considered investments with low credit risk. It is the Company's policy to measure the expected credit losses on these instruments on a 12-month basis. When the credit risk of any bond deteriorates, the company sells the bonds and buys bonds that meet the required investment grade.

The Company considers a financial asset to be impaired (credit impaired) when contractual payments are past due 90 days or more. However, in some cases, the Company may also consider a financial asset to have defaulted on when internal or external information indicates that it is unlikely that the Company will receive the outstanding contractual amounts. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Measurement of Expected Credit Loss for Investments in Debt Instruments:

The company calculates ECL based on scenarios for measuring the expected cash shortfall, discounted at the appropriate effective interest rate. The cash shortage is the difference between the cash flows owed to the company in accordance with the contract and the cash flows the business expects to receive.

When estimating ECL, the company considers three scenarios (base case, upside, and downside).

The following are the main mechanisms and elements for measuring ECL:

- a) Probability of default: It is an estimate of the probability of default within a certain period. Failure is assessed only if the financial asset's balance has not been previously derecognized and is still recognized in the financial statements. The probability-to-failure model consists of a macroeconomic outlook and a segmentation of the portfolio of financial assets.
- b) Loss in the event of failure: It is an estimate of the loss arising in the event of failure. It is based on the difference between the contractual cash flows due and those the lender expects to receive, including cash flows from the sale of retained security or other credit enhancements.

c) Balance at risk: An estimate of the balance at risk of failure at the future date of failure at the borrower's level, considering expected changes in the balance at risk after the end of the financial period, including interest accrued from missed payments.

The company classifies its financial assets subject to ECL calculations into one of the following categories, which are defined as follows:

(a) Stage one: 12-month expected credit loss

The financial instrument is classified as low risk upon initial recognition in the first stage and the credit risk is monitored on an ongoing basis by the company's management. The 12-month ECL is calculated as the portion of the long-term ECL that is the expected credit loss from default events on the financial instrument that is possible within 12 months after the reporting date. The Company calculates the 12-month ECL based on an expectation of default occurring in the 12 months after the reporting date. The 12-month forecasted odds of default are applied to the defaulted balance multiplied by the default loss and discounted at the appropriate effective interest rate. This calculation is made for each of the three scenarios, as described above. Interest income is computed on the total carrying amount of the financial asset (without deducting the provision for expected credit losses).

(B) The second stage: the expected credit loss over the life - with no impairment of credit value

The second stage includes financial assets that have had a significant increase in credit risk since initial recognition, but there is no objective evidence of impairment. Expected credit losses are recognized over the life of those assets, but interest income continues to be calculated on the total carrying amount of the assets. Lifetime ECL is the expected credit loss resulting from all possible defaults over the expected life of the financial instrument, according to mechanisms like those described above, including the use of multiple scenarios, but the PD and PLN values are estimated on the life of the financial asset. Expected losses are discounted at the appropriate effective interest rate.

At the end of each reporting period, the Company assesses whether there has been a significant increase in the credit risk of financial assets since the first recognition. The Company uses both quantitative and qualitative information to determine whether there has been a significant increase in credit risk based on the characteristics of the financial asset. Quantitative information can be a downgrade in the credit rating below the investment grade. Qualitative information is obtained by monitoring current or expected adverse changes in business, financial or economic conditions that are expected to cause a material (negative) change in the debtor's ability to meet its obligations to the company. In general, the Company will consider a default on payment for a period of more than 30 days after the due date as an automatic indicator of a significant increase in credit risk.

If a significant increase in material risk is identified, this results in the transfer of all instruments in the range held with that party from Stage 1 to Stage 2.

(C) Stage Three: Lifetime Expected Credit Loss - Credit Impairment:

The third stage includes financial assets for which there is objective evidence of impairment at the date of the financial statements; For these assets, lifetime expected credit losses are recognized. Interest income is recognized on an amortized cost basis discounted by the expected credit losses from impairment. For debt instruments considered credit-impaired, the Company recognizes lifetime ECLs for such instruments, according to mechanisms like those described above, with the probability of default set at 100%.

The company identifies financial assets for which there is objective evidence of impairment under Egyptian Accounting Standard No. (47) by applying the definition of default used for credit risk management purposes. The company defines default as: any counterparty is unable to meet its obligations (regardless of the amount involved or the number of days due), or when the counterparties have more than 90 days of arrears.

When applying this definition, the following information may serve as evidence that a financial asset is creditimpaired:

- § a breach of contract such as failure or late payment.
- § it is probable that the borrower will enter bankruptcy or other financial reorganization; or

§ The borrower is facing great financial difficulty due to the disappearance of an active market.

Change between stages (first, second, third):

(a) Change from the second stage to the first stage:

The financial asset is not transferred from the second stage to the first stage until after all the quantitative and qualitative elements of the first stage are met and the full arrears of the financial asset and the returns are paid.

(B) Change from the third stage to the second stage:

The financial asset may not be transferred from the third stage to the second stage until all the following conditions are met:

- Completion of all quantitative and qualitative elements of the second stage.
- Paying 20% of the outstanding balances of the financial asset, including the accrued interest set aside/marginalized.
- Regular payment for at least 12 months.

Measuring Expected Credit Loss:

The company has four types of financial assets that are subject to the ECL model:

- 1) Return receipts resulting from sales contracts with customers.
- 2) Interests for delaying the payment of the returned receipts.
- 3) The company's investments in debt instruments are measured according to the amortized cost method.
- 4) The company's investments in debt instruments are measured at fair value through other comprehensive income.

While cash and cash equivalents are also subject to impairment requirements for financial assets in accordance with Egyptian Accounting Standard No. (47) Financial Instruments, the measured impairment losses were not significant.

Equity tools

The Company subsequently measures all investments in equity instruments at fair value. And when the company's management chooses to present fair value gains and losses on investments in equity instruments in the statement of other comprehensive income, it is not subsequently reclassified to the statement of profit or loss after disposing of the investment. Dividends from these investments continue to be recognized in the profit or loss statement as other income when the company's right to receive such distributions is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in the other income / (expenses) item in the statement of profit or loss, as the case may be. Impairment losses (and the reversal of impairment losses) on investments in equity instruments that are measured at fair value through other comprehensive income are recognized separately from other changes in fair value.

Impairment

At the date of the financial statements, the Company assesses whether there is credit impairment of financial assets that are measured at amortized cost and securities that are measured at fair value through other comprehensive income. Credit impairment of a financial asset occurs when there is an event or detrimental events to the expected cash flows of the financial asset.

Evidence of credit impairment includes the following observable data:

- Breach of contract by defaulting on repaying the loan on the due date
- Restructuring the loan or advance payment from the company on terms that are not in the company's favor.
- It is probable that the borrower will go bankrupt or any other financial event, or the disappearance of an active market for the asset due to financial difficulties.

Provisions for financial assets at amortized cost are deducted from the total value of the asset.

Financial liabilities:

Financial liabilities are classified as either "at fair value through profit or loss" financial liabilities or other financial liabilities.

Other financial liabilities:

Other financial liabilities include loan balances, if any, accounts payable, balances due to related parties and other credit balances. The first financial liabilities are recognized at fair value (the value received) after deducting the cost of the transaction, provided that they are subsequently measured at amortized cost using the effective interest rate and the distribution of interest expense on related periods on the basis of the effective return.

The effective interest rate method is a method of calculating the amortized cost of financial liabilities and of charging interest expense over the relevant periods.

The effective interest rate is the rate that exactly discounts future cash payments through the estimated life of the financial liability, or a shorter appropriate period.

Derecognition of financial instruments from the books

A financial asset is derecognized when the company transfers substantially all the risks and benefits of ownership of the asset to a party outside the company. If the Company continues to control the transferred financial asset, then it recognizes the interest it retains in the asset and a corresponding liability representing the amounts it may have to pay.

But if the transaction results in the company retaining substantially all the risks and benefits of ownership of the transferred financial asset, then the company continues to recognize the financial asset, provided it also recognizes the amounts received as a loan against the guarantee of that asset.

Financial liabilities are derecognized when they are either settled, canceled or contractually expired.

Effective interest rate method

The effective interest rate method is used to calculate the amortized cost of financial assets that represent debt instruments and to distribute the return over the relevant periods. The effective interest rate is the rate on the basis of which future cash receipts are discounted (which includes all fees, payments or receipts between the parties to the contract, which are considered part of the effective interest rate as well as the transaction cost and any other premiums) over the estimated life of the financial assets or any appropriate shorter period.

The return on all debt instruments is recognized on the basis of the effective interest rate, except for those classified as financial assets at fair value through profit or loss, where the return on them is included in the net change in their fair value.

42-8 Lease contracts

In January 1, 2021, the management made a detailed assessment of the impact of applying Egyptian Accounting Standard No. (49) on the company's independent financial statements.

- Egyptian Accounting Standard No. 49 replaced the previous Egyptian Accounting Standard No. 20 "Accounting Rules and Standards Related to Financial Leasing Operations". Under the new leasing standard, the assets leased by the Company are recorded in the Company's statement of financial position with the corresponding liability recorded.
- During the year 2021, the company made a detailed assessment of the impact of Egyptian Accounting Standard No. 49, and the impact of applying Standard No. 49 was as follows:
- The company, as a lessee, recognized the right of use asset and the lease contract obligations at the commencement date of the lease.
- With initial recognition, right of use has been measured as the amount equal to the initial measurement of the lease liability, adjusted for past lease payments, initial direct cost, lease incentives, and the discounted present value of the estimated liability for disposal of the asset. Subsequently, the right-of-use asset will be measured at cost less accumulated depreciation and accumulated impairment losses. Depreciation is calculated on a straight-line basis over the estimated useful lives of the right of use assets or the lease term, whichever is shorter.
- The lease liability was measured at initial recognition at the present value of the future lease and related fixed service payments over the lease term, discounted at the interest rate implicit in the lease or the

company's incremental borrowing rate. Generally, the company uses the incremental borrowing rate as the discount rate. The subsequent lease liability is measured at amortized cost using the effective interest method.

- Right of use assets and lease contract liability are subsequently remeasured if one of the following events occurs:
- -The change in the lease price due to the index or rate that became effective in the period of the financial statements.
- Amendments to the lease contract
- Re-evaluation of the lease term
- Leases that are short-term in nature (less than 12 months including extension options) and leases of low-value items will continue to be recognized as expenses in the profit or loss statement as incurred.

Transitional rules:

The company adopted the Egyptian Accounting Standard No. 49 calculated on the basis of the remaining period of the contract, and the comparison numbers were not modified, based on Paragraph C8 of the appendix to the standard regarding the rules regarding the effective date and the transitional rules.

42-9 Investments in the subsidiary company

- Investments in subsidiaries are accounted for at cost - and if some indications and indications of the possibility of impairment losses in the value of investment in subsidiaries appear on the date of the financial statements, the book value of those investments is reduced to their recoverable value and the resulting impairment losses are immediately included in the list of profits or losses.

42-10 Inventories

- Inventories are stated at lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less estimated cost to completion and selling expenses. The cost of inventory is determined as follows: -
- Raw materials, supplies, fuel, oil and spare parts are valued at actual cost on the moving average basis.
- Catalysts are valued at the actual purchase.
- Finished goods and work in progress are valued at actual production cost which includes direct materials, direct labor and its share of manufacturing fixed and variable overheads.

42-11 Cash and cash equivalent

For the purpose of preparing the statement of cash flows, cash and cash equivalents comprise cash at banks and on hand, time deposits and treasury bills with maturity not exceeding three months and are represented net of banks - overdraft (if any) which is paid on demand and which is an integral part of the company's money management.

42-12 Contingent liabilities and Provisions

Provisions are recognized when there is an existing legal obligation or inferred from surrounding circumstances as a result of a past event and it is probable that an outflow of economic benefits will be used to settle that obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, then the value of the provisions is determined by discounting the expected future cash flows at a pre-tax discount rate that reflects the current market assessment of the time value of money and the risks related to the obligation, if appropriate.

The balance of provisions is reviewed on the date of the financial position and adjusted (if necessary) to reflect the current best estimate

42-13 Employee benefits

1-Employee benefits:

A-Short term Employee benefits:

- Wages and salaries Liabilities, including leave and allowances, expected to be paid in full within the twelve months following the end of the period during which employees provide the relevant service are recognized under employee services until the end of the disclosed financial period.

- They are measured on the basis of the amounts expected to be paid when the liability is settled, and the liabilities appear as current employee bonus liabilities in the statement of financial position.

B-Long term employee benefits:

- -- Long-term employee benefits obligations are measured by the present value of the expected future payments that will be paid for the services provided by employees until the end of the disclosed financial period using the expected unit credit method and are recorded as a non-current liability and take into account the expected future increase in salaries and previous rates of workforce reduction and periods of service. Future payments are discounted using market returns at the end of the disclosed financial period on high-quality corporate bonds and government bonds with terms and currencies that match as closely as possible the estimated future cash outflows.
- The re-measurement is recognized resulting from the actuarial assumptions in the statement of other comprehensive income.

Liabilities are presented as current liabilities in the statement of financial position unless the company has an unconditional right to postpone payment for a period of at least 12 months after the disclosed financial period, regardless of the date of actual payment.

B-1 Health care after retirement (Defined Benefit Plan):

- The company provides post-retirement health care benefits to eligible retirees and their dependents throughout their lives and accrues the expected costs of these benefits over the period of employment using a similar accounting method as that used in defined benefit programs.
- Remeasurement gains and losses resulting from adjustments and changes based on actuarial assumptions are charged to the statement of other comprehensive income in the period in which they arise, and the obligations are evaluated annually by an actuarial expert.

Accounting for these programs requires the Company to make certain assumptions regarding discount rates used to measure future liabilities and expenses, inflation rates, trend rates for health care costs and mortality, and other assumptions, and these assumptions are subject to change significantly.

Actuarial valuations, market conditions, and changes in contracted benefits. The testing of assumptions is based on past trends and future estimates based on economic and market conditions at the valuation date. However, actual results may differ materially from the estimates based on the significant assumptions used.

B-2 End of service benefits upon retirement on a pension:

- -The actuarial evaluation process takes into account the provisions of the work system and company policy.
 -The net liability recognized in the stated statement of financial position for the post-employment defined benefit program represents the present value of the expected defined benefit obligation less the fair value of the program assets (if any) at the date of the financial statements.
- -Defined benefit obligations are remeasured on a periodic basis by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting estimated future cash outflows using interest rates for high-quality corporate bonds that are denominated in the currency in which the benefits are paid and that have maturity periods similar to the duration of the relevant obligations.
- -In countries where there are no markets for such types of bonds, market rates for government bonds are used.
- -The net interest cost is calculated by applying discount rates to the net balance of the defined benefit obligation and the fair value of the program assets, if any.
- -Current service costs are calculated using the actuarially determined pension cost rate at the end of the previous year adjusted to account for significant market fluctuations and any significant non-recurring events such as plan modifications, curtailments and adjustments.
- -In the absence of these significant market fluctuations and one-time events, the actuarial obligations are extended based on the assumptions at the beginning of the year.
- -If there are material changes to the assumptions or arrangements during the initial period, consideration should be given to remeasuring those obligations and related costs.
- -Remeasurement gains or losses arising from changes in actuarial assumptions in the period during which they occur are included in the statement of other comprehensive income.
- -Changes in the present value of the defined benefit obligation resulting from program modifications or workforce reductions are recognized directly in the profit or loss statement as past service costs.

- -When the benefits program is modified, the portion of benefits related to employees' prior service is recognized as an expense or revenue.
- Current and past service costs related to post-service benefits are immediately recognized in the income statement with the reversal of the liability according to the discount rates used and include transfer costs and any changes in the net liability that are directed to the actuarial evaluation process, and changes in assumptions are considered as remeasurements in other comprehensive income items.

B-3 Employee retirement pension liabilities

The company pays its contributions to the systems of the General Authority for Social Insurance on a mandatory basis in accordance with Social Insurance Law No. 79 of 1975 and its amendments, and the company does not have any other obligations once it pays its obligations. Regular contributions are recognized as a periodic cost in the year they are due and are included in the labor cost in the statement of profit or loss.

Expenses resulting from the specified subscription system are charged to the statement of profit or loss according to the accrual basis.

42-14 Employees profit share:

The Company pays 10% of its cash dividends as profit sharing to its employees provided that it will not exceed total employees' annual salaries. Profit sharing is recognized as a dividend distribution through equity and as a liability when approved by the Company's shareholders. And the Company did not realize liability for profit sharing to its employees for non- distributed profits.

42-15 Legal reserve

According to the companies' law and the Company's status, at least 5% of the net profit is retained to form legal reserve till it reaches 50% of the issued capital, transferring to the legal reserve stops when it reaches 50% of the issued capital. When the legal reserve declines below 50%, the Company starts retaining at least 5% of its net profit till it reaches 50% of the issued capital again. This reserve is not subject to distribution but may be used to increase capital or mitigate losses. Legal reserve is recognized in the financial year where the ordinary general assembly meeting been approved to decide the increase of the reserve.

42-16 Accounting for income tax

Income Taxes and deferred taxes

A provision is formed to meet possible tax liabilities and disputes from the management point of view in light of the received tax claims and after conducting the necessary studies in this regard.

- The company's independent profit or loss statement is periodically charged with an estimated tax burden for each fiscal period, which includes both the current tax value and the deferred tax, provided that the actual tax burden is established at the end of each fiscal year.
- Deferred tax assets and liabilities represent the expected tax effects of the temporary differences resulting from the difference in the value of assets and liabilities according to tax rules and between the book values of those assets and liabilities according to the accounting principles used in preparing the financial statements.
- The current tax is calculated on the basis of the tax base determined according to the laws, regulations and instructions in force in this regard and using the tax rates in force at the date of preparing the financial statements, while the deferred tax value is determined using the tax rates expected to be applied in the periods during which the obligation will be settled or the asset will be used based on the tax rates and tax laws in force at the date of the financial statements.
- The deferred tax is recorded as an expense or revenue in the income statement, except for those related to items that are directly recorded within the equity, so the related deferred tax is also dealt directly within the equity.
- In general, all deferred tax liabilities (resulting from taxable temporary differences in the future) are recognized, while deferred tax assets (resulting from taxable temporary differences) are not recognized unless there is a strong probability or other convincing evidence of achieving sufficient tax profits in the future.

42-17 Segment report

Operating segments are disclosed in a manner consistent with the internal reporting information provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Company's Board of Directors.

42-18 Earnings per share

Basic and diluted earnings per share is calculated by dividing the profit or loss attributable to ordinary equity holders of the company by the weighted average number of ordinary shares outstanding during the period.

42-19 Statement of Cash Flows

The statement of cash flows is prepared using the indirect method.
